08/15/06 - Winchester, Va--Own the Zone Sporting Goods, LLC today announced the release of its new band vibration dampener for tennis and other racquet sports. The Own the Zone vibration dampener, significantly improves upon the band solution used by several of the world's Top 10 ranked tennis pros. Players will improve their game by significantly reducing racquet vibration, gaining more control and more power.

"We make a better vibration dampener specially designed for the rigors of the sport and the repeated stress placed on the tendons attached to a player's elbow," said Julius Stockfish, Co-President, Own the Zone Sporting Goods, LLC. "Independent tests show that the Own the Zone bands dampen vibration better than most grommet, worm and gel dampeners. The Own the Zone bands are easy to attach and won't fly off your strings like Rafael Nadal's grommet dampener did on a crucial point during the final set at Wimbledon 2006."

"Our Own the Zone band dampeners are ultra light, retain the feel of the ball and create a crisp, clean sound at impact," said David Marcus, Co-President, Own the Zone Sporting Goods, LLC. "Own the Zone ("OTZ") has rewritten the book on tennis vibration dampeners. Our players can even make a fashion statement by wearing their spare brightly colored bands on their wrists."

Available in eight colors, the Own the Zone bands will be carried at select sporting good chains, tennis specialty shops, local pro shops and online distributors throughout the United States.

About Own the Zone Sporting Goods, LLC:

The company designs and distributes innovative and fun sports products that help players reach their zone of peak performance. Based on excellent design and the use of quality materials, the company's first patent pending product, the Own the Zone vibration dampener, significantly improves upon the band solution used by several of the world's Top 10 ranked tennis pros.
